

## Supplemental Floor Protection System

Fastlane Floor Protector is a modular system designed to enable usage of Fastlane turnstiles without the need for drilling fixing bolts into the floor or running a conduit for cables under the floor between pedestals.

### Overview

Floor Protector allows for quick, efficient, and cost-effective installation of Fastlane optical turnstiles without damaging the floor of the building.

### Applications

Floor Protector is ideal for applications where the flooring materials used (such as marble, tile, granite, etc.) in the floor restrict drilling and cabling or where any such work would be prohibited. Additionally, the system is useful for temporary installations where the tenants of a building are not allowed to affect the infrastructure of the building.

### Accessibility

Floor Protector meets ADA specifications, and the angle and height of the ramp ensure ADA compliance and wheelchair-friendly access.

### Technical specifications

#### Dimensions

- › Length: varies by turnstile model
- › Maximum Height: .78" (20 mm) Standard
- › Width: 26" (660 mm)
- › Wide Width: 36" (915 mm)

#### Slope Angle

- › 1 in 12

#### Material

- › Mild steel

#### Cable Tray Dimensions

- › 1.9" x .6" (50 mm x 15 mm)

#### Color

- › Varies by turnstile

Due to continuous improvements, specifications are subject to change without prior notice.

With thousands of systems installed on 6 continents, Fastlane is a world leader in elegant and intelligent optical turnstiles.

Manufactured by Integrated Design Limited. Fastlane is a registered trademark of IDL, 1995.
