

## Supplemental barrier used with Fastlane turnstiles

With a design aesthetic that matches Fastlane turnstiles, the Fastlane Infill system is a sleek and effective method for controlling the flow of traffic that can be adapted to fill a variety of gaps.

### Design

The Infill system is available in three configurations – a fixed model, a free-standing model, and a wing that attaches to the side of a Fastlane turnstile pedestal. It has been developed to complement all existing Fastlane models and offers an elegant way to direct traffic and seal points of potential breach.

### Security

While all three models physically prevent entry via naturally occurring gaps outside of your entry control system, the freestanding model is also equipped with a tamper alarm that detects if the infill is moved.

### Technical Specifications

#### Post Dimensions

Fixed Model:

- › Post Height: 38" (965 mm)
- › Diameter: 1.9" (48 mm)
- › Base Diameter: 5" (125 mm)
- › Fixings: 2 x M10 fixings (fixed-only)

#### Materials

- › Panels: .4" (10 mm) clear toughened glass
- › Posts and fittings: brushed stainless steel

#### Panel Width

Fixed Model Options:

- › 19.7" (500 mm), post center to post center
- › 39.4" (1000 mm)
- › Custom width up to 39.4" (1000 mm)

Free-standing Model Options:

- › 19.7" (500 mm)
- › 39.4" (1000 mm)

Wing Model:

Available for Glasswing and Glassgate 400 only

- › For gaps up to 15.75" (400 mm) wide
- › Attaches directly to the pedestal

#### Panel Height

- › Standard height for all models is - 38" (965 mm)
- › Fixed infill full-height: 70.9" (1800 mm)

#### Post Configuration (Fixed Infill only)

- › Posts can be configured as middle or end pieces as well as at 90 or 135 angles
