

Secure the Open Door

Introducing the Door Detective® from Smarter Security

The Missing Link in Door Security

Automated Protection Without Additional Personnel

Enhancing facility protection, Smarter Security's Door Detective eliminates the blind spot in traditional access control systems by ensuring only one authorized person can pass through an open or unlocked door per credential, in the approved direction. This next-generation solution secures vulnerable entry points and counters common criminal tactics like tailgating, piggybacking, and collusion that exploit trust to gain unauthorized entry, protecting organizations from potentially devastating security breaches that could result in millions in damages.

3 Top Ways Door Detective Prevents Unauthorized Entry

- 1. Advanced Access Protection** - Deter, detect and mitigate various forms of unauthorized physical access activity, including the following violations:
 - Tailgating
 - Anti-Passback
 - Access Direction
 - Occupancy
 - Piggybacking
 - Loitering
 - Door Prop
- 2. Supplemental Access Controls** - Augment access control capabilities by restricting passage between two areas based on:
 - Access Direction
 - Occupancy Levels
 - Emergency Status
- 3. Real-time Integrations** - Improve overall security capabilities with simple integrations between complementary security equipment, such as:
 - Physical Access controls
 - Video Surveillance

Key Markets:

Airports
Casinos
Critical Infrastructure
Data Centers
Distribution Centers
Federal Facilities
Financial Institutions
Fitness Centers
Hospitals
IT/Telecom
Laboratories
Office Buildings
Utility Closets

Selecting the Right Door Detective for Your Needs

Choosing the right Door Detective model is essential for protecting your interior doors. Each model has unique features that cater to the specific needs of your business and employees, and can easily be incorporated into your overall security strategy.
