

Frictionless Entrance Control

A Match Made for Protecting

Fastlane® Turnstiles with Idemia Integrations

Smarter Security's Fastlane turnstiles easily integrate with one of the leading providers in innovative biometric access control technology, IDEMIA, to create advanced touchless entry solutions. Whether it's Idemia's MorphoWave™ or their latest frictionless biometric access control device, VisionPass, a wide array of Fastlane pedestal models can seamlessly accommodate these technologies to create the highest level of protection for your organization.

More than a turnstile

Smarter Security's Fastlane turnstiles are made of stainless steel and toughened safety glass, making them effortless to clean and sanitize regularly. We offer an extensive suite of reader mounting solutions to enhance your security protocols with any 3rd party readers.

Smarter Security's SmarterMount is a universal post mount solution upon which Idemia's VisionPass can be mounted. As an integral part of the turnstile end cap, this versatile solution can either be:

- Purchased as an option with new turnstile orders, or
- Bought as a simple retrofit solution for the thousands of existing Fastlanes

VisionPass

Combining years of experience in the development of facial recognition algorithms and devices for the most demanding applications (governments, airports, ect.) with its latest advances in AI, IDEMIA proposes the most powerful facial recognition device for the access control market.

Key product features

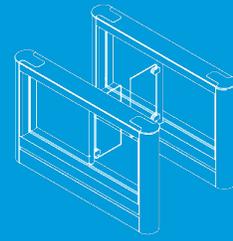

- Fully handsfree: no need to interact with the device
- Wide angle detection for persons of all sizes (1.20-2.00m) and side approach
- Caters to all skin colors
- High performance: near-motion 1-second matching with up to 40,000 users
- iBeta PAD evaluated against spoofing attempts by photo presentation or 3D masks
- Efficiency in all light conditions: from complete obscurity to strong sunlight

MorphoWave

The award-winning MorphoWave™ technology has become the benchmark in frictionless access, securing high traffic access points in the world's largest financial institutions, critical infrastructure facilities, universities, and healthcare organizations.

Key product features

- Contactless 3D scanning of 4 fingerprints in less than 1 second
- Quick, convenient hand wave gesture
- High throughput up to 60 users per minute
- Up to 100,000 users

Automate Decisions for Quick Response

Add the advancement of access control to any of our turnstiles for less with SmarterLobby for easy workflow automation and interoperability, allowing Fastlane turnstiles to go well beyond enforcement of anti-tailgating and credentialing.

By combining SmarterLobby with any Fastlane Glassgate model and Idemia VisionPass, organizations can restrict entry for mask compliance and social distancing or automate unbiased screening at randomized intervals.

Empower Your Security

With Smarter Security's Fastlane optical turnstiles and Idemia's biometric technology, your organization can feel confident that they are getting the most advanced security measures in the industry. Call today for a FREE security protocol evaluation from one of our experts at **1.800.943.0043**.

About Smarter Security

Smarter Security markets the world's most intelligent Entrance and Access Control solutions. Fastlane turnstiles, Door Detectives, and SmarterLobby harness the power of neural network technology to provide unrivaled intelligence to pedestrian access control. We secure more than half of the Fortune 100, providing security solutions known globally for high reliability at a lower total cost of ownership. Visit www.smartersecurity.com.
