

Fastlane Speedgates

Discover the Versatility

Unsurpassed Throughputs
Pinpoint Accuracy
Field-Proven Reliability
Lower Total Cost of Ownership

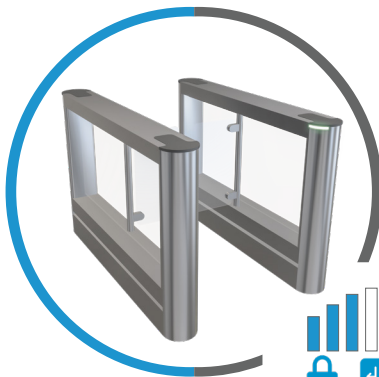

Features

-  Locking brake option
-  Multiple barrier heights
-  Multiple lane widths
-  Security level

Fastlane Glassgate 150

Our most compact, economic, and popular model offering unsurpassed accuracy and speed.

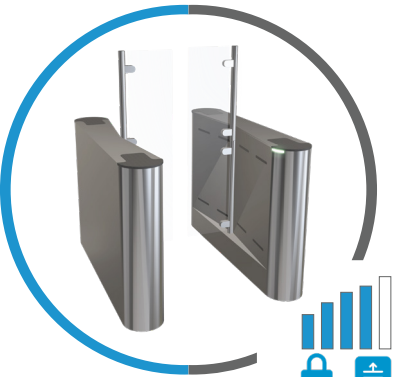

Fastlane Glassgate 155

Offers lane widths up to 47" and features new sidegating technology for side-by-side collusion detection.

Fastlane Glassgate 200

The original speedgate is perfect for facilities with limited floor space featuring slim pedestals and a single tall glass barrier.

Fastlane Glassgate 200 Plus

Slim pedestals with tall, dual swinging glass barriers for standard and ADA lanes featuring a locking brake option.

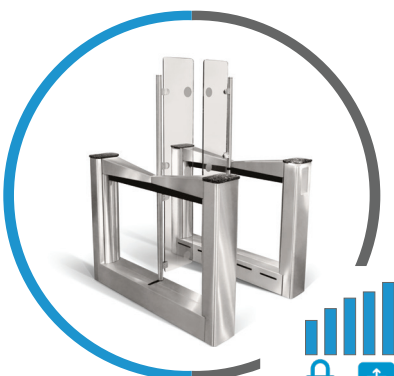

Fastlane Glassgate 250

Bi-directional dual-glass barriers, metal side panels, and extra space to accommodate a host of third-party technology integrations.

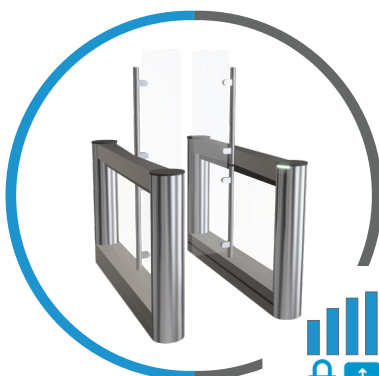

Fastlane Glassgate 300

One of our best-selling products for high security applications. Features a striking t-shaped design and four barrier-height options.

Fastlane Glassgate 400

Our premium model for high-security applications, with four barrier-height options for the highest level of physical deterrent.

Fastlane Glassgate 400 Plus

Offers extra advantage over Glassgate 400 in that maximum lane widths can be achieved with advanced sidegating technology.

Fastlane Glasswing

"Angel wing" glass barriers that retract fully into the pedestals upon authorization, unique from other turnstiles.
