Smarter Security

Smarter in Every Way
Intelligent and Elegant Entrance Control

PRODUCT BROCHURE

Make Every Entrance Smarter

The finest in turnstiles and doorway-mounted entrance control,
backed by the ultimate customer service.

Fastlane® Optical Turnstiles

Unrivaled breadth of choice with everything you need

INTELLIGENCE

Advanced infrared and computing technologies accurately
pinpoint the size, shape, and speed of individual entities —
detecting tailgaters less than 1/4" apart on many models (the
closest in the industry). Additionally, most feature IP-enabled
Fastlane Connect™, which enables complete control using
Fastlane's Multilane Controller or any authorized computer
or smartphone. All of our systems can integrate with the rest
of your security infrastructure to ensure cohesive, seamless
control from doorway to network gateway (or door to network).

AESTHETICS

Unmatched craftsmanship and stunning good looks
elevate your environment while our technology protects it.
Fastlane's sleek, cutting-edge pedestals and barriers can
be customized to match your lobby, your budget and your
design ideals. Fastlane turnstiles also fit most accessories,
including multiple biometric authentication technologies,
card readers and elevator displays, which we factory-
install for a truly polished look.

SPEED

Get the fastest throughput in the industry — up to one
person every second — without sacrificing security.
Because Fastlane technology can track multiple entities
in the lane, there's no need to wait for one authorized user
to pass through before a second authorized person can
go. As a result, buildings can often use fewer lanes without
experiencing traffic buildup during peak periods.

RELIABILITY

Built for the long haul, Fastlane turnstiles deliver consistent
performance, fewer maintenance headaches, and a lower
total cost of ownership. Fastlane's quality manufacturing
system has been compliant with ISO 9001 standards for
more than 18 years, helping ensure that Fastlane customers
get what they want, when they want it.

Door Detective®

Highly accurate doorway entrance control

Door Detective is like a virtual security officer for access
controlled doors, detecting unauthorized entrants,
tailgating and direction violations. It integrates with access
control systems as well as building management systems
for mustering and life safety. Door Detective is the ideal
solution for facilities such as data centers, R&D laboratories,
executive floors, residence halls and distribution centers.

World-class Customer Service

Nothing's more important than taking exceptional care
of our customers. We're here to help you select the right
products for your security needs, customize them to suit
your environment, ensure a smooth implementation, and
keep everything working in optimal fashion. If you've got
a question, our 24/7 service ensures you get an answer ASAP.
We also provide lifetime remote support on every Fastlane
product — and if an issue cannot be resolved remotely, we'll
assist you onsite.

The Fastlane Plus 400 MA with customized square pedestals, multi-directional Invariwisp™ stainless steel finish and elevator integration offers top-of-the-line aesthetics and security in Building 4 of the World Trade Center.

Smarter Security provides unsurpassed intelligence
to help prevent "human hacking" for more than

50% of the Fortune 100

and some of the world's most iconic buildings, including the World Trade Center.

" You can feel the quality workmanship in both the aesthetics and operation.

*- Larry Silverstein, owner and manager, World Trade Center Towers 3, 4 and 7
and chairman of Silverstein Properties*

Our flagship line

Fastlane Speedgates

Ideal for: Environments where aesthetics and security are paramount

- Elegant, contemporary designs in all sizes seamlessly complement modern lobby interiors
- Bi-directional or retracting glass barriers up to 6' high move quickly and quietly for an open, inviting environment and beautiful first impression

The Glassgate 300 is our most unique speedgate, with its striking t-shaped design and ultra-sleek glass-sided frame.

Speedgate Highlights

- Unsurpassed multi-microprocessor intelligence
- Superior ¼" tailgate detection
- Unsurpassed throughput

- Highly customizable
- Durable, reliable and low voltage/low energy consumption
- ISO 9001, UL availability and ADA compliant

Speedgate Models

Fastlane Glassgate 150
Our most compact, economic, and popular model offers unsurpassed accuracy and speed

Fastlane Glassgate 155
Concealed optical systems for a sleeker look, optional locking brakes and wider lane widths up to 47"

Fastlane Glassgate 200
The original speedgate with slim pedestals and various barrier height options

Fastlane Glassgate 250
Bi-directional dual-glass barriers, metal side panels and extra space for integrations

Fastlane Glassgate 300
Striking t-shaped design and ultra-sleek frame with glass sides, four barrier-height options and a locking brake option

Fastlane Glassgate 400
A premium model for high-security applications, with a robust footprint, four barrier-height options and a locking brake option

Fastlane Glassgate 200 Plus
Wider and slightly longer pedestals then Glassgate 200 features dual panels of glass for standard and ADA lanes, and enables several ADA lanes to operate together

Fastlane Glassgate 400 Plus
Offers extra advantage over Glassgate 400 in that maximum lane widths can be achieved with advanced side by side detection technology

Fastlane Glasswing
"Angel wing" glass barriers that retract fully into the pedestals upon authorization

Streamlined style

Fastlane Plus Barrier-Arm Turnstiles

Ideal for: Environments such as reception areas or elevator lobbies, where space may be limited but effective entrance control is still required

- Sleek 6.6"-wide pedestals with modern sophistication
- Fast-acting variable-tension aluminum barrier arms that break away in the direction of travel and return to a secure state automatically

The compact Fastlane Plus 400 MA features dual barrier arms that quickly retract into the pedestal upon user authorization.

Barrier-Arm Turnstile Highlights

- Unsurpassed multi-microprocessor intelligence
- Options for different operation modes with remote mode selection
- Fastlane Connect IP communication and control

- Superior ¼" tailgate detection
- Compact elegance with multiple customization options
- ISO 9001, UL availability and ADA compliant

Barrier-Arm Turnstile Models

Fastlane Plus 400 MA
Our versatile streamlined design with self-resetting breakaway arms and intuitive lane status display to guide users

Fastlane Plus 400 AS
Extended pedestal length that includes an additional set of detection beams compared to the 400 MA, which empowers the use of "normally open" operation

Discreet, effective and versatile

Fastlane Barrier-Free Turnstiles

Ideal for: Environments requiring lower security and minimal impact

- Unobtrusive security inspired by architects
- Open lane design keeps lobbies light and airy, while still highly secure
- Streamlined designs with small footprints

The Fastlane Clearstyle has a very discrete and modern appearance with clear acrylic sides and stainless steel end panels.

Barrier-Free Turnstile Highlights

- Unsurpassed tailgate detection
- Fastlane Connect IP communication and control
- Architect-inspired minimalism, multiple customization options
- ISO 9001, UL availability and ADA compliant

Barrier-Free Turnstile Models

Fastlane Compact
Compact footprint — a mere 18 inches in length

Fastlane 400 OT
Mid-sized footprint with a more prominent pedestal, delivers unsurpassed detection performance with 18 individual infrared beam paths

Fastlane Clearstyle 200
Our unique model with patented clear side panels that refract the beams, resulting in a clean, minimalist pedestal

Fastlane Clearstyle 400
Same sleek, airy look as the Clearstyle 200, with an enclosure ideal for internally-mounted readers

The Intelligate provides an extra-wide lane to a turnstile installation and is suitable for all users, including people with reduced mobility and wheelchairs. It also allows for easy passage of bulky deliveries.

Complementary designs that enable passage for carts, packages and those with reduced mobility

Fastlane Intelligate and Passgate Entrance Gates

Ideal for: Environments such as reception areas or elevator lobbies, where space may be limited but effective entrance control is still required

Entrance Gate Models

Fastlane Intelligate
Bi-directional motorized access gate with advanced intelligent infrared beam matrix and tailgate detection.

Fastlane Intelligate 300
The sleek Intelligate 300 offers multiple glass-height options.

Fastlane Passgate
Bi-directional motorized access gate that opens to allow passage upon command from the guard desk via a pushbutton or after a user presents proper authorization.

Fastlane Passgate 300
Fastlane Passgate 300 offers multiple heights and widths.

Options To Make Your Entrance Extraordinary

Your lobby sets the tone for the entire building. Smarter Security® has all the options you need to make everything harmonize perfectly.

Finishes

Our most requested standard finish is 304 Brushed Stainless Steel, designed to create a luxe, high-tech feel. When our clients need a custom look, we typically work with Rimex metals, the world's leading producer of surface finishes on stainless steel and other metals. In addition, the stainless steel on most models can be powder-coated based on standard RAL colors.
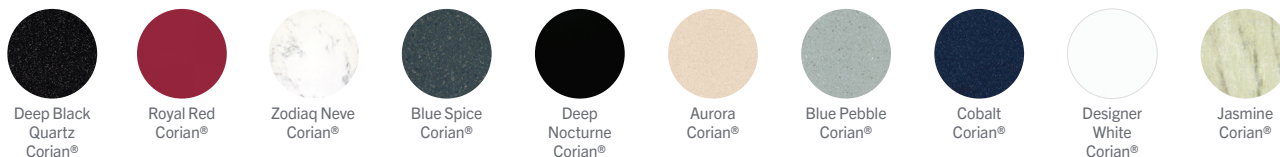

RIMEX METAL FINISHES

Stainless Steel	Bronze	Champagne	Mirror Black	Charcoal	Rosy Gold	Black	Blue

MOST POPULAR WOOD FINISHES

Savanna Red Oak	Walnut	White Oak	Chocolate Red Oak	White Birch

Tops

Most of our models come with standard Deep Black Quartz Corian® tops. Other Corian varieties can be customized.

POPULAR CORIAN COLORS

| Deep Black Quartz Corian®	Royal Red Corian®	Zodiaq Neve Corian®	Blue Spice Corian®	Deep Nocturne Corian®	Aurora Corian®	Blue Pebble Corian®	Cobalt Corian®	Designer White Corian®	Jasmine Corian®

Glass Options

Most of our models can accommodate an optional low-iron glass that is clear, or frosted glass. In addition, the glass panels can be customized with a frosted logo.

GLASS OPTIONS

Clear	Frosted

Integrated Security

- Versatile infill closes adjacent gaps and can be floor-mounted, wall-mounted or free-standing

- Embedded pressure sensors detect climb-over attempts while retaining the sleek design

- Remotes help you control lanes easily with a touch of the screen or button

- Proximity, Bluetooth and smart card readers can be discreetly installed below the Corian parts of pedestal tops adjacent to end panels, or within the end panels

- Optional integration with leading elevator dispatch displays, typically mounted below a window within the pedestal decorative top

- Fastscan multi-tech reader solutions integrate a proximity card reader with a barcode/QR reader providing a single Wiegand output

Customization in Action

View examples of some of our extraordinary entrance transformations.

The Golden Touch

The **Fastlane Plus 400 MA** turnstiles are transformed to provide a warm, elegant entrance featuring a stunning metallic finish that blends in beautifully with the surrounding walls and elevators. The tops are designer white-backed glass tops.

Sleek and Sophisticated

The **Fastlane Glassgate 150** turnstiles showcase well for those high-traffic entrances offering unsurpassed speed and accuracy. Here they have been customized in a powder-coated white finish with glass tops, and base skirts that obscure coring from prior solutions.

Detect tailgating without adding extra security staff

Door Detective

Doors with locks provide good security — until they're opened. Door Detective uses a network of beam paths with neural network intelligence to ensure that only one person enters for each authorization. It not only monitors how many people pass through, but also ensures that they move only in the approved direction. It's a cost-efficient way to extend security to interior areas where intruders could enter unnoticed.

- Signals activity such as unauthorized entrants, tailgating, collusion and obstruction to alert staff to violations while eliminating false alarms
- Accurately monitors movement in both directions
- Works seamlessly with access control systems for added security and building management systems for mustering and life safety
- Enables seamless security without needing additional authentication from user
- Gets up and running quickly and easily through CAT 5 interconnections and POE (Door Detective Plus)

Door Detective Models

Door Detective Classic
- Higher-end aesthetics
- Beams can rotate to extend across hallways without door jam mounting
- Internal CPU with an external 12 VDC power supply

Door Detective Compact
- Most economical model
- Smallest footprint
- External CPU and 12 VDC power supply

Door Detective Plus
- Internal CPU and PoE power
- IP communications to support remote configuration and population counting
- Unsurpassed tailgate detection

Phenomenal Customer Service

We're with you all the way.

SITE CERTIFICATION
Includes a test and review of all wiring and turnstile settings, plus functional testing and onsite training for both integrators and end users.

FULL YEAR WARRANTY
Increases to three years with site certification.

PREVENTIVE MAINTENANCE
Onsite service, performed by Certified Smarter Security technicians.

LIFETIME REMOTE SUPPORT
With onsite service for any issues that cannot be resolved remotely.

24/7 PHONE SUPPORT
The most responsive in the industry.

Smarter Security will always:

- Supply the best technologies and designs
- Craft a custom solution where one is required
- Provide assistance through the purchase process with a consultative approach
- Bring expertise and focus when products are ready to be installed
- Offer lifetime support to ease usage and maximize ROI

About Smarter Security

Smarter Security markets the world's most intelligent Entrance and Access Control solutions. Fastlane turnstiles, Door Detectives, SmarterLobby and ReconaSense harness the power of neural network technology to provide unrivaled intelligence to pedestrian access control. We secure more than half of the Fortune 100, providing security solutions known globally for high reliability at a lower total cost of ownership. Visit **www.smartersecurity.com**.
