

Layered Security Solutions for Facilities in Flux

The Next Generation of Smart Buildings

Intelligent Solutions for Smart Buildings

New rules are forming around how people, places, and things interact across the enterprise. Nobody knows what is next, but new tools can keep you better equipped for the unexpected.

These tools are:

- Multi-Layered
- Continuously Monitored
- Risk-Adaptive

Smarter Security® designed the following solutions to make each layer of any facility more intelligent.

01

SmarterLobby

- Multi-Factor Turnstiles
- Layered Lobbies
- Risk Adaptive Turnstile
- Risk Adaptive Entry

02

SmarterAccess

- Risk Adaptive Access Control
- Layered Access
- Risk Adaptive Authorization

03

SmarterESP

- Multi-Layered Security Management
- Layered Management
- Risk Adaptive Command & Control

Lobbies with Layers

A building is only as smart as its front door.

Unlike others, SmarterLobby transforms turnstiles into automation tools for intelligent facilities. Unique to Fastlane® turnstiles, SmarterLobby applies critical data from other sensor systems to impact entry permissions.

ENABLE NEXT-GENERATION SCREENING

Designed to automatically evaluate surrounding signals and adjust entry based on user-definable policies, SmarterLobby empowers optical turnstiles to go beyond credentialing and enforcement of anti-tailgating policies.

Unbiased Screening

Restrict entry when randomized interval detected

Mask Compliance

Restrict entry when uncovered face is detected

Frictionless Entry

Enable entry through more turnstiles when queue is detected

Social Distancing

Restrict entry when area capacity is met

Social Unrest

Restrict entry when crowd is detected

Fever Scanning

Restrict entry when fever is detected

Weapon Detection

Restrict entry when weapon is detected

This simplifies and optimizes the screening of high-volume traffic and high-value entrances without additional labor.

Standard Features

- Event Logging
- Alarm Monitoring
- Floorplan Map Designer
- System Administration
- Rules Engine
- ONVIF Video Viewer

Optional Features

- Mass Notification
- Mobile Client
- iWatch Client
- Role-Based Access Control
- Video Management API
- Video Analytics API
- Asset Management API
- Ticketing API
- BACNET Interface
- Mercury Controllers
- Hardware Power Supply & Enclosure

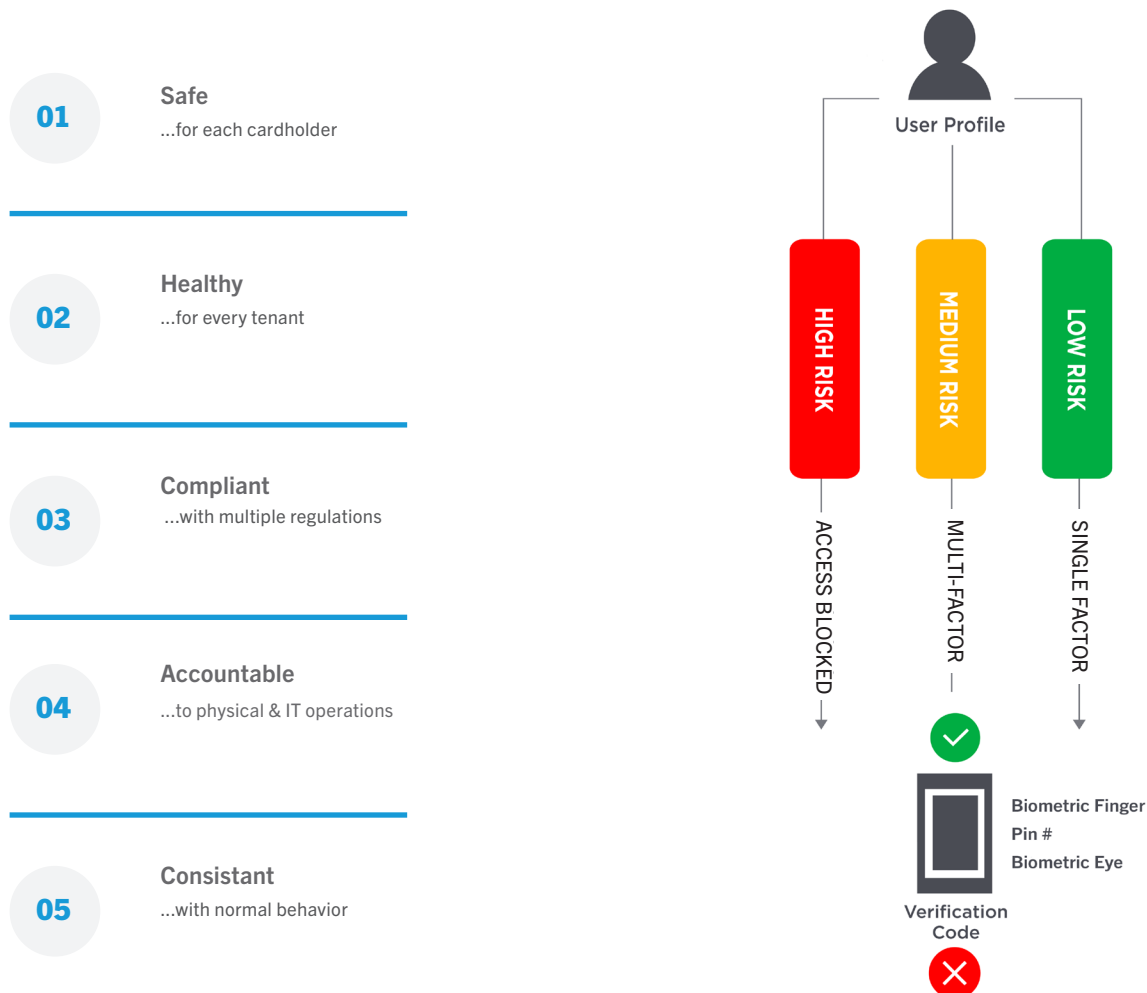

Access with Layers

Before letting someone enter their home, people assess multiple factors. Why is commercial access control any different?

SmarterAccess is the only real-time physical access control system that can continuously evaluate multiple factors across multiple layers of technology prior to authorization. Unlike others, SmarterAccess enables intelligent and adaptive permissions based on what matters most to your organization.

CONTROL WITH CONTEXT

Whether you require basic or advanced access control, Mercury-based SmarterAccess empowers you with a simplified and unified access control platform. No costly “rip-and-replace” of legacy solutions needed, typically just a software upgrade. With SmarterAccess, facilities can continuously evaluate and verify that each physical access request is authorized as:

SmarterAccess is the premier platform for intelligent physical authorization as the industry’s only Risk-Adaptive Physical Access Control (RADPACS) using non-proprietary commercial off-the-shelf (COTS) components (APL#10301)

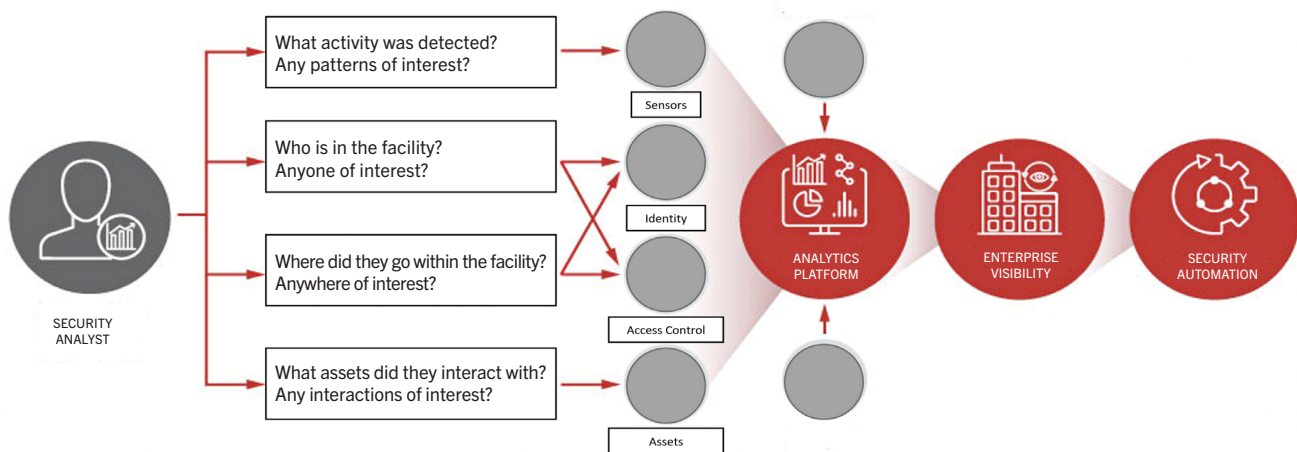

Security Management with Layers

SmarterESP is the first proactive situational awareness platform that functions as a highly customizable Command and Control system for the enterprise. It features a unique threat scoring engine that automatically triggers enhanced policies and controls once risk thresholds are reached. This transformative platform unifies existing and future systems and can give advanced notice of potential threats before they become security events. SmarterESP is a highly customizable platform designed to tackle your most pressing security challenges.

COMPONENTS OF NEXT-GENERATION PHYSEC

An evolved security management platform gives an enterprise control and visibility of the entire infrastructure. SmarterESP provides context-rich insights around any policy breach and gives advanced threat detection and incident response.

Securing Federal Facilities?

APL 10301

MEET RECONASENSE

ReconaSense is the first COTS Risk-Adaptive security framework that helps protect federal, military, critical and other sensitive facilities requiring top-grade security. Our patented solution meets and exceeds Government regulations for HSPD-12, FIPS 201, ICD705, UL1076, and FIPS 140-2.

ReconaSense identifies risks and helps mitigate potential threats before they happen. It's predictive nature and interoperability enables security teams to achieve unprecedented situational awareness and rapid response capabilities.

For more information, contact our Director of Federal Solutions, Kevin Kolego at **443.567.1830** or email at kkolego@smartersecurity.com.

Are You Ready For Smarter Security?

Whether you're looking for more intelligent lobby, door, or enterprise-wide security, we've got you covered.

Call us at 1.800.943.0043 to see how together we can solve your security challenges.

About Smarter Security

Smarter Security markets the world's most intelligent Entrance and Access Control solutions. Fastlane® turnstiles, Door Detectives®, SmarterLobby, SmarterAccess, SmarterESP and ReconaSense harness the power of neural network technology to provide unrivaled intelligence to pedestrian access control. We secure more than half of the Fortune 100, providing security solutions known globally for high reliability at a lower total cost of ownership. Visit www.smartersecurity.com.

For more information, email us at info@smartersecurity.com or call us at **800.943.0043**.
