

Risk-Adaptive turnstiles

SmarterLobby[®]

A Smarter Way to (Re)Open

Legacy turnstiles can be great at detecting tailgaters, but truly securing a smart building now requires more. SmarterLobby is the industry's first solution that looks beyond a credential. It weighs critical data from other sensor systems and sources into turnstile permission decisions. Like a lobby operating system, this unique software offers custom apps that dramatically increase the security and ROI from Fastlane[®] turnstiles. SmarterLobby further distinguishes Fastlane as the industry's only intelligent turnstile brand. So ask yourself, what might you want your turnstiles to know in the future before letting someone into your facility?

Intelligent Automation and Integration

SmarterLobby is architected for easy workflow automation and interoperability with 3rd party technologies. This allows Fastlane turnstiles to go well beyond enforcement of anti-tailgating, delivering additional functionality and enhanced lobby security.

1 REMAIN COMPLIANT

Security is the first policy to break in reality.

Create policies that enable turnstiles to automatically enforce physical compliance beyond anti-tailgating.

2 REDUCE EXPOSURE

Threats are changing.

Use new or existing third-party technology to not only detect risk in lobby environments, but mitigate threats before they gain access.

3 ELIMINATE BIAS

Humans are subjective.

Create objective or randomized intervals for unbiased and auditable enforcement of secondary screening.

4 UNLOCK EFFICIENCIES

Every facility is unique.

Define procedures that fit your perfect balance of automation and intervention to give your facility a proactive safety posture.

Advanced Screening

SmarterLobby is designed to operate in lobby environments with existing or new Fastlane turnstiles and access control systems. SmarterLobby and Fastlane enable advanced screening applications, such as:

Unbiased Screening

Restrict entry when randomized interval detected

Mask Compliance

Restrict entry when uncovered face is detected

Frictionless Entry

Enable entry through more turnstiles when queue is detected

Social Distancing

Restrict entry when area capacity is met

Social Unrest

Restrict entry when crowd is detected

Fever Scanning

Restrict entry when fever is detected

Weapon Detection

Restrict entry when weapon is detected

What do you wish your turnstiles knew?

Standard Features

- Event Logging
- Alarm Monitoring
- Floorplan Map Designer
- System Administration
- Rules Engine
- ONVIF Video Viewer

Optional Features

- Mass Notification
- Mobile Client
- iWatch Client
- Role-Based Access Control
- Video Management API
- Video Analytics API
- Asset Management API
- Ticketing API
- PatriotOne API
- BACNET Interface
- Mercury Controllers
- Hardware Power Supply & Enclosure

About Smarter Security

Smarter Security markets the world's most intelligent Entrance and Access Control solutions. Fastlane turnstiles, Door Detectives and SmarterLobby harness the power of neural network technology to provide unrivaled intelligence to pedestrian access control. We secure more than half of the Fortune 100, providing security solutions known globally for high reliability at a lower total cost of ownership. Visit www.smartersecurity.com.
